

**Muskegon Area ISD** has subscribed to a Season Pass for *Technology in Practice*, ISTE's continuing Webinar Series. This series features thirty highly engaging Webinars over the course of 2008-2009. Each Webinar will feature a Web 2.0 tool or innovative technology of wide appeal to educators. Each session will be at least 60 minutes in length, with 45 minutes of presenter content. The balance of the session will feature interactive elements such as audience Q&A and polls, and previews of upcoming ISTE Webinar events.

The theme of the series, *Technology in Practice*, will highlight practical tools and strategies to help educators most effectively improve the educational experience and capture value from new and existing technology investments. In addition to the webinars, you will receive a link to the archived recording, as well as valuable resources, shortly after the webinar concludes.

Except where noted, all ISTE webinars take place at 4:00 PM at MAISD. Registration is **FREE**. You may sign up for any or all of the webinars in the series. For information on how to register, click on the Professional Development link on the ISD web site (<http://www.muskegonisd.org>).
